I HAVE TARDIVE DYSKINESIA (TD)

I have TD, a neurological condition caused by certain prescription medications. TD may affect my face, limbs, torso, and other body parts, including my speech. TD causes jerky and involuntary movements that I can't control.

Made possible
with support from

neurocrine
BIOSCIENCES

teva

SYMPTOMS OF TARDIVE DYSKINESIA CAN INCLUDE

- Facial grimacing
- Sticking out one's tongue
- Involuntary movements
- Speech difficulties
- Slower, twisting movements
